

Etsy launch: owner setup + fulfillment (Service Pro CRM)

Store decision: Etsy = primary (has buyer search traffic). Gumroad = backup link for community posts.

Owner actions (one-time, ~15 min total; only you can do these)

These need your identity/KYC, so they're the human parts I can't do:

1. **Create the Etsy seller account** → etsy.com/sell. Pick a shop name (suggestions: `ServiceProTools`, `OwnItCRM`, `SheetworksCo`). Set currency = USD.
2. **Connect payments** → Etsy Payments (deposits to your bank) + confirm ID. (You mentioned Square/Stripe. Etsy uses its own Etsy Payments; keep Square for the Gumroad/direct backup.)
3. **Create a Google account** to hold the master sheet (or use your existing one).
4. **Send me:** the shop name once live. That's it. I handle listings, images, copy, delivery flow.

Etsy requires a physical/digital item + a card on file to open. There's a ~\$0.20 listing fee per item and ~6.5% transaction fee. On a \$69 product that's ~\$4.70, well worth the built-in traffic.

Digital delivery on Etsy (how the buyer gets it)

Etsy allows a **PDF** as the delivered digital file. So we deliver a 1-page PDF that contains:

- The "Make your copy" button/link to the shared master sheet (Anyone-with-link ▶ Viewer).
- The 5-minute quick-start steps.

I'll generate that delivery PDF. When someone buys, Etsy auto-sends the PDF → they click the link → *File ▶ Make a copy* → they own it. **Zero action from you per sale.**

Listing plan (I build these)

Listing	Price	Notes
Service Pro CRM (universal)	\$69	Flagship
Cleaning Business CRM	\$69	Re-skinned variant
Lawn Care / Landscaping CRM	\$69	Re-skinned variant
"Done-for-you setup" add-on	\$149	I brand + configure it; still just me

3 listings from day one = 3x the search surface on Etsy.

What I deliver next (no input needed)

- ☒ Product engine (`Code.gs`) with follow-up + review automation
- ☒ Listing screenshots (`assets/`)
- ☐ The buyer delivery PDF (quick-start + copy link)
- ☐ 2 niche re-skins (Cleaning, Lawn Care)
- ☐ Final listing copy tuned to Etsy SEO

Honest expectation-setting

Etsy brings traffic, but a brand-new shop ranks slowly for the first ~2–4 weeks. To hit \$2k inside your window we pair the listings with a light push: I'll write ready-to-post blurbs for 3–4 relevant Facebook groups / subreddits; you paste-and-post. That combination is what gets us to ~30 sales fast rather than waiting on Etsy SEO alone.
